

Dear Colleague:

On behalf of the organizing committee at the Center of Excellence for Innovation in Chemistry (PERCH-CIC), we would like to welcome everyone to participate in PERCH-CIC Congress X: 2018 International Congress for Innovation in Chemistry during July 4-7, 2018, at Jomtien Palm Beach Hotel & Resort, Pattaya, Chonburi, Thailand.

The PERCH-CIC Congress series is a platform for students on the scholarships to present their works and form network with peers and experts in the fields. In addition, it is an opportunity to forge new professional connections and get engaged in meaningful scientific discussions. Under this year's theme "Contributing Expertise for Thailand 4.0," this congress is also aimed to convene intellectual inputs toward the country's recently unveiled policy. Therefore, your presence and contribution to the congress would not only strengthen the scientific rigor of the science, but also add new scope and dimension to future partnerships at multiple levels.

As an important participant at this event, you will have access to not only scientific sessions contributed by leading experts in the fields, but also exciting parallel sessions such as the state-of-the-art metabolomics workshop and the innovation-focused industry forum. If there is anything else that we can do to better facilitate your participation, please do not hesitate to bring it to our attention.

We look forward to seeing you at the congress.

Sincerely yours,

Professor Vichai Reutrakul
Director of the Center of Excellence for Innovation in Chemistry
Department of Chemistry, Faculty of Science
Mahidol University, Rama VI Road
Ratchathewi, Bangkok 10400, Thailand
